

CITY OF TAYLOR
GENERAL EMPLOYEES RETIREMENT SYSTEM
GASB STATEMENT NOS. 67 AND 68 ACCOUNTING AND
FINANCIAL REPORTING FOR PENSIONS
DECEMBER 31, 2015

November 10, 2016

Board of Trustees
City of Taylor General
Employees Retirement System
Taylor, Michigan

Ladies and Gentlemen:

This report provides information required by the City of Taylor General Employees Retirement System in connection with the Governmental Accounting Standards Board (GASB) Statement No. 67 "Financial Reporting for Pension Plans" and Governmental Accounting Standards Board (GASB) Statement No. 68 "Accounting and Financial Reporting for Pensions."

Our actuarial calculations for this report were prepared for the purpose of complying with the requirements of GASB Statement Nos. 67 and 68. These calculations have been made on a basis that is consistent with our understanding of this Statement.

Our calculation of the liability associated with the benefits described in this report was performed for the purpose of satisfying the requirements of GASB Statement Nos. 67 and 68. The calculation of the plan's liability for this report may not be applicable for funding purposes of the plan. A calculation of the plan's liability for purposes other than satisfying the requirements of GASB Statement Nos. 67 and 68 may produce significantly different results. This report may be provided to parties other than the City of Taylor General Employees Retirement System only in its entirety and only with the permission of the City of Taylor General Employees Retirement System. GRS is not responsible for unauthorized use of this report.

This report is based upon information, furnished to us by the City of Taylor General Employees Retirement System, concerning retirement and ancillary benefits, active members, deferred vested members, retirees and beneficiaries, and financial data. This information was checked for internal consistency, but it was not audited.

The total pension liability, net pension liability, and certain sensitivity information shown in this report are based on an actuarial valuation performed as of December 31, 2014. The total pension liability was rolled-forward from the valuation date to the plan year ending December 31, 2015 using generally accepted actuarial principles.

This report complements the actuarial valuation report that was provided to the City of Taylor General Employees Retirement System and should be considered in conjunction with that report. Please see the actuarial valuation report as of December 31, 2014 for additional discussion of the nature of actuarial calculations and more information related to participant data, economic and demographic assumptions, and benefit provisions.

This report is intended to assist in preparation of the financial statements of the City of Taylor General Employees Retirement System. Financial statements are the responsibility of the reporting entity and not the actuary. The statements are subject to an auditor's review. Please let us know if the plan's auditor recommends any changes.

To the best of our knowledge, the information contained within this report is accurate and fairly represents the actuarial position of the City of Taylor General Employees Retirement System. All calculations have been made in conformity with generally accepted actuarial principles and practices as well as with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

The signing individuals are independent of the plan sponsor.

Brad Lee Armstrong is a Member of the American Academy of Actuaries (MAAA) and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

Respectfully submitted,

A handwritten signature in black ink that reads "Brad Lee Armstrong". The signature is fluid and cursive, with a prominent initial "B" and a long horizontal stroke at the end.

Brad Lee Armstrong, ASA, EA, FCA, MAAA

A handwritten signature in black ink that reads "David L. Hoffman". The signature is cursive and includes a large initial "D" and a stylized "H".

David L. Hoffman

EXECUTIVE SUMMARY

**EXECUTIVE SUMMARY
AS OF DECEMBER 31, 2015**

	2015
Actuarial Valuation Date	December 31, 2014
Measurement Date of the Net Pension Liability	December 31, 2015
Employer's Fiscal Year Ending Date (Reporting Date)	December 31, 2015

Membership

Number of	
- Retirees and Beneficiaries	250
- Inactive, Nonretired Members	23
- Active Members	65
- Total	338
Covered Payroll#	\$ 3,405,502

Net Pension Liability

Total Pension Liability	\$ 82,015,212
Plan Fiduciary Net Position	38,393,908
Net Pension Liability	\$ 43,621,304
Plan Fiduciary Net Position as a Percentage of Total Pension Liability	46.81 %
Net Pension Liability as a Percentage of Covered Payroll	1,280.91 %

Development of the Single Discount Rate

Single Discount Rate	7.50 %
Long-Term Expected Rate of Investment Return	7.50 %
Long-Term Municipal Bond Rate*	3.57 %
Last year ending December 31 in the 2016 to 2115 projection period for which projected benefit payments are fully funded	2115

Total Pension Expense \$ 7,594,074

Deferred Outflows and Deferred Inflows of Resources by Source to be Recognized in Future Pension Expenses

	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	\$ 154,967	\$ -
Changes in assumptions	372,209	-
Net difference between projected and actual earnings on pension plan investments	2,489,082	-
Total	\$ 3,016,258	\$ -

* Source: "20-Bond GO Index" is the Bond Buyer Index, general obligation, 20 years to maturity, mixed quality. In describing this index, the Bond Buyer notes that the bonds' average credit quality is roughly equivalent to Moody's Investors Service's Aa2 rating and Standard & Poor's Corp.'s AA. The rate shown is as of December 30, 2015, the most recent date available on or before the measurement date.

Projected payroll based on the December 31, 2014 valuation. This may not be the same as "covered payroll" as defined in GASB Statement No. 67.

DISCUSSION

Accounting Standard

For pension plans that are administered through trusts or equivalent arrangements, Governmental Accounting Standards Board (GASB) Statement No. 67 establishes standards of financial reporting for separately issued financial reports and specifies the required approach for measuring the pension liability. Similarly, GASB Statement No. 68 establishes standards for state and local government employers (as well as non-employer contributing entities) to account for and disclose the net pension liability, pension expense, and other information associated with providing retirement benefits to their employees (and former employees) on their basic financial statements.

The following discussion provides a summary of the information that is required to be disclosed under these accounting standards. A number of these disclosure items are provided in this report. However, certain information, such as notes regarding accounting policies and investments, is not included in this report and the Retirement System and/or plan sponsor will be responsible for preparing and disclosing that information to comply with these accounting standards.

Financial Statements

GASB Statement No. 68 requires state or local governments to recognize the net pension liability and the pension expense on their financial statements. The net pension liability is the difference between the total pension liability and the plan's fiduciary net position. In traditional actuarial terms, this is analogous to the accrued liability less the market value of assets (not the smoothed actuarial value of assets that is often encountered in actuarial valuations performed to determine the employer's contribution requirement).

Paragraph 57 of GASB Statement No. 68 states, "Contributions to the pension plan from the employer subsequent to the measurement date of the collective net pension liability and before the end of the employer's reporting period should be reported as a deferred outflow of resources related to pensions." The information contained in this report does not incorporate any contributions made to the City of Taylor General Employees Retirement System subsequent to the measurement date of December 31, 2015.

The pension expense recognized each fiscal year is equal to the change in the net pension liability from the beginning of the year to the end of the year, adjusted for deferred recognition of the liability and investment experience.

Pension plans that prepare their own, stand-alone financial statements are required to present two financial statements – a statement of fiduciary net position and a statement of changes in fiduciary net position in accordance with GASB Statement No. 67. The *statement of fiduciary net position* presents the assets and liabilities of the pension plan at the end of the pension plan's reporting period. The *statement of changes in fiduciary net position* presents the additions, such as contributions and investment income, and deductions, such as benefit payments and expenses, and net increase or decrease in the fiduciary net position.

Notes to Financial Statements

GASB Statement No. 68 requires the notes of the employer's financial statements to disclose the total pension expense, the pension plan's liabilities and assets, and deferred outflows and inflows of resources related to pensions.

GASB Statement Nos. 67 and 68 require the notes of the financial statements for the employers and pension plans, to include certain additional information. The list of disclosure items should include:

- a description of benefits provided by the plan;
- the type of employees and number of members covered by the pension plan;
- a description of the plan's funding policy, which includes member and employer contribution requirements;
- the pension plan's investment policies;
- the pension plan's fiduciary net position, net pension liability, and the pension plan's fiduciary net position as a percentage of the total pension liability;
- the net pension liability using a discount rate that is 1% higher and 1% lower than used to calculate the total pension liability and net pension liability for financial reporting purposes;
- significant assumptions and methods used to calculate the total pension liability;
- inputs to the discount rates; and
- certain information about mortality assumptions and the dates of experience studies.

Retirement systems that issue stand-alone financial statements are required to disclose additional information in accordance with GASB Statement No. 67. This information includes:

- the composition of the pension plan's Board and the authority under which benefit terms may be amended;
- a description of how fair value is determined;
- information regarding certain reserves and investments, which include concentrations of investments greater than or equal to 5%, receivables, and insurance contracts excluded from plan assets.

Required Supplementary Information

GASB Statement No. 67 requires a 10-year fiscal history of:

- sources of changes in the net pension liability;
- information about the components of the net pension liability and related ratios, including the pension plan's fiduciary net position as a percentage of the total pension liability, and the net pension liability as a percent of covered-employee payroll; and
- a comparison of the actual employer contributions to the actuarially determined contributions based on the plan's funding policy.

Timing of the Valuation

An actuarial valuation to determine the total pension liability is required to be performed at least every two years. The net pension liability and pension expense should be measured as of the pension plan's fiscal year end (measurement date) on a date that is within the employer's prior fiscal year. If the actuarial valuation used to determine the total pension liability is not calculated as of the measurement date, the total pension liability is required to be rolled forward from the actuarial valuation date to the measurement date.

The total pension liability shown in this report is based on an actuarial valuation performed as of December 31, 2014 and a measurement date of December 31, 2015.

Single Discount Rate

Projected benefit payments are required to be discounted to their actuarial present values using a Single Discount Rate that reflects (1) a long-term expected rate of return on pension plan investments (to the extent that the plan's fiduciary net position is projected to be sufficient to pay benefits) and (2) tax-exempt municipal bond rate based on the Bond Buyer Index, general obligation, 20 years to maturity, mixed quality. The Bond Buyer notes that the bonds' average credit quality is roughly equivalent to Moody's Investors Service's Aa2 rating and Standard & Poor's Corp.'s AA as of the measurement date (to the extent that the contributions for use with the long-term expected rate of return are not met).

For the purpose of this valuation, the expected rate of return on pension plan investments is 7.50%; the municipal bond rate is 3.57% (based on the weekly rate closest to but not later than the measurement date of the "20-Bond GO Index" from the Bond Buyer Index, general obligation, 20 years to maturity, mixed quality); and the resulting Single Discount Rate is 7.50%.

Projected payroll based on the December 31, 2014 valuation. This may not be the same as "covered payroll" as defined in GASB Statement No. 67.

NOTES TO SCHEDULE OF CONTRIBUTIONS

Valuation Date:	December 31, 2014
Notes	The roll-forward of total pension liability from December 31, 2014 to December 31, 2015 reflects expected service cost and interest reduced by actual benefit payments and administrative expenses. Actuarially determined contribution rates are calculated as of December 31, which is 1.5 year prior to the beginning of the fiscal year in which contributions are reported.

Methods and Assumptions Used to Determine Contribution Rates:

Actuarial Cost Method	Aggregate
Amortization Method	Level dollar, closed
Remaining Amortization Period	27 years for the December 31, 2014 valuation.
Asset Valuation Method	5-Year smoothed market
Inflation	2.50% -- approximate; No explicit price inflation assumption is used in this valuation.
Salary Increases	1.00%
Investment Rate of Return	7.50%
Retirement Age	Experience-based table of rates that are specific to the type of eligibility condition.
Mortality	RP-2014 Healthy Annuitant Mortality Table for males and females. Prior to the 2013 valuation, 1971 Group Annuity Mortality table projected to 1984, setback 6 years for females.

Other Information:

Notes	There were no benefit changes during the year. The interest and wage inflation assumptions were updated as of December 31, 2014.
-------	--

SECTION D

NOTES TO FINANCIAL STATEMENTS

Auditor's Note – This information is intended to assist in preparation of the financial statements of the City of Taylor General Employees Retirement System. Financial statements are the responsibility of management, subject to the auditor's review. Please let us know if the auditor recommends any changes.

Long-Term Expected Return on Plan Assets

The assumed rate of investment return was adopted by the plan's trustees after considering input from the plan's investment consultant(s) and actuary(s). Additional information about the assumed rate of investment return is included in our actuarial valuation report as of December 31, 2014.

Best estimates of arithmetic real rates of return as of the measurement date will be supplied by the Retirement System's investment consultant.

Single Discount Rate

A Single Discount Rate of 7.50% was used to measure the total pension liability. This Single Discount Rate was based on the expected rate of return on pension plan investments of 7.50%. The projection of cash flows used to determine this Single Discount Rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Regarding the sensitivity of the net pension liability to changes in the Single Discount Rate, the following presents the plan's net pension liability, calculated using a Single Discount Rate of 7.50%, as well as what the plan's net pension liability would be if it were calculated using a Single Discount Rate that is one percent lower or one percent higher:

SENSITIVITY OF NET PENSION LIABILITY TO THE SINGLE DISCOUNT RATE ASSUMPTION

	Current Single Discount		
	1% Decrease 6.50%	Rate Assumption 7.50%	1% Increase 8.50%
Total Pension Liability (TPL)	\$ 89,989,466	\$ 82,015,212	\$ 75,220,799
Net Position Restricted for Pensions	38,393,908	38,393,908	38,393,908

SECTION E

SUMMARY OF BENEFITS

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
LOCAL 1128 AFSCME
(FOR MEMBERS HIRED BEFORE 8/4/88)**

Normal Retirement

Eligibility - Earlier of: (a) Age 55 with 8 or more years of service (10 or more years if hired after 8/1/82), and (b) 25 years of service.

Annual Amount - In accordance with the following:

Years of Service	Annual Benefit as a % of Final Average Earnings
8 or more (hired before 8/1/82)	55.00%
10 or more (hired after 8/1/82)	55.00

Type of Final Average Compensation - Average of best 5 years prior to retirement date.

Early Retirement

Eligibility - Earlier of: (a) Age 48 with 8 or more years of service (10 or more years if hired after 8/1/82), and (b) 18 years of service.

Annual Amount - Computed as a normal retirement benefit based on final average compensation at early retirement date, multiplied by a fraction made up of the number of years of service at early retirement divided by the number of years of potential service at normal retirement, and multiplied by the Table A actuarial reduction factor to reflect retirement prior to normal retirement date.

Late Retirement

Eligibility - Any age after normal retirement date.

Annual Amount - Computed as a normal retirement benefit but increased by 2% of final average compensation at late retirement date for each year worked between the normal retirement date and the late retirement date.

Deferred (Vested) Retirement

Eligibility - 8 or more years of service (10 or more years if hired after 8/1/82). Benefit commences at age 55.

Annual Amount - Computed as a normal retirement benefit based on service and final average compensation at time of termination of employment.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
LOCAL 1128 AFSCME
(FOR MEMBERS HIRED BEFORE 8/4/88)
(CONCLUDED)**

Death Before Retirement Benefits

Eligibility - Death while actively employed after 8 or more years of service (10 or more years if hired after 8/1/82). Payable to the employee's spouse for life.

Annual Amount - Equal to 50% of the retirement benefit the employee could have received if eligible for retirement at date of death. If the employee is not eligible to retire at date of death, the benefit begins at earliest date the employee could have retired had the employee survived. If the employee is not married at date of death, or has less than the required years of service, the employee's named beneficiary will receive a refund of employee's contributions with interest.

Death After Retirement

In accordance with optional form of benefit elected by employee, if any.

Disability Retirement

Eligibility - No age or service requirement, but must be eligible to receive Social Security Disability Benefits.

Annual Amount - 66 2/3% of earnings with a maximum benefit of \$2,000/month. The benefit is re-calculated at normal retirement based on normal retirement benefit formula.

Member Contributions - 5% of compensation.

Interest on Member Contributions - 5% Annually.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
LOCAL 1917
(FOR MEMBERS HIRED BEFORE 8/4/88)**

Normal Retirement

Eligibility - Earlier of: (a) Age 55 with 8 or more years of service and (b) 25 years of service.

Annual Amount - In accordance with the following:

<u>Years of Service</u>	<u>Annual Benefit as a % of Final Average Earnings</u>
8 or more	55.00%

Type of Final Average Compensation - Average of best 5 years prior to retirement date.

Early Retirement

Eligibility - Earlier of: (a) Age 48 with 8 or more years of service and (b) 18 years of service.

Annual Amount - Computed as a normal retirement benefit based on final average compensation at early retirement date and multiplied by the Table A actuarial reduction factor to reflect retirement prior to normal retirement date.

Late Retirement

Eligibility - Any age after normal retirement date.

Annual Amount - Computed as a normal retirement benefit but actuarially increased to reflect late retirement on the basis of the factors specified in Table H, and based on final average compensation at late retirement date.

Deferred (Vested) Retirement

Eligibility - 8 or more years of service. Benefit commences at age 55.

Annual amount - Computed as a normal retirement benefit based on service and final average compensation at time of termination of employment.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
LOCAL 1917
(FOR MEMBERS HIRED BEFORE 8/4/88)
(CONCLUDED)**

Death Before Retirement Benefits

Eligibility - Death while actively employed after 8 or more years of service. Payable to the employee's spouse for life.

Annual Amount - Equal to 50% of the retirement benefit the employee could have received if eligible for retirement at date of death. If the employee is not eligible to retire at date of death, the benefit begins at earliest date the employee could have retired had the employee survived. If the employee is not married at date of death, or has less than the required years of service, the employee's named beneficiary will receive a refund of employee's contributions with interest.

Death After Retirement

In accordance with optional form of benefit elected by employee, if any.

Disability Retirement

Eligibility - No age or service requirement, but must be eligible to receive Social Security Disability Benefits.

Annual Amount - 66 2/3% of earnings with a maximum benefit of \$1,500/month. The benefit is re-calculated at normal retirement based on normal retirement benefit formula.

Member Contributions - 5% of compensation.

Interest on Member Contributions - 5% Annually.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
TAYLOR GOVERNMENTAL MANAGEMENT AND ADMINISTRATIVE
EMPLOYEES ASSOCIATION
(FOR MEMBERS HIRED BEFORE 5/18/88)**

Normal Retirement

Eligibility - Age 55 with 4 or more years of service or any age with 25 or more years of service.

Annual Amount - In accordance with the following:

<u>Years of Service</u>	<u>Annual Benefit as a % of Final Average Earnings</u>
4	30.00%
5	36.25
6	42.50
7	48.75
8	55.00
9	55.00
10	55.00
11	55.00
12	55.00
13 or more	65.00

Type of Final Average Compensation - Average of best 5 years prior to retirement date.

Early Retirement

Eligibility - Any age with 4 or more years of service.

Annual Amount - Computed as a normal retirement benefit based on final average compensation at early retirement date and multiplied by the Table A actuarial reduction factor to reflect retirement prior to normal retirement date.

Late Retirement

Eligibility - Anytime following eligibility for normal retirement and having attained 13 years of service.

Annual amount - Computed as a normal retirement benefit but actuarially increased to reflect late retirement on the basis of the factors specified in Table H, and based on final average compensation at late retirement date.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
TAYLOR GOVERNMENTAL MANAGEMENT AND ADMINISTRATIVE
EMPLOYEES ASSOCIATION
(FOR MEMBERS HIRED BEFORE 5/18/88)
(CONCLUDED)**

Deferred (Vested) Retirement

Eligibility - 4 or more years of service. Benefit commences at age 55.

Annual amount - Computed as a normal retirement benefit based on service and final average compensation at time of termination of employment.

DEATH BEFORE RETIREMENT BENEFITS

Eligibility - Death while actively employed after 4 or more years of service. Payable to the employee's spouse for life.

Annual Amount - If an employee who is vested in the pension plan dies prior to retirement, his/her beneficiary will receive the employee's accrued pension benefit for life actuarially adjusted based on the age of the beneficiary at the time the benefit is paid. Beneficiary shall be defined as: spouse or (in the absence of a spouse) minor children until the age of 21.

Death After Retirement

In accordance with optional form of benefit elected by employee, if any.

Disability Retirement

Eligibility - No age or service requirement, but must be eligible to receive Social Security Disability Benefits.

Annual Amount - 66 2/3% of earnings with a maximum benefit of \$2,000/month. The benefit is re-calculated at normal retirement based on normal retirement benefit formula.

Member Contributions - 5% of compensation.

Interest on Member Contributions - 2% Annually.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
ELECTED OFFICIALS
(FOR MEMBERS ELECTED BEFORE 11/27/89)**

Normal Retirement

Eligibility - Age 55 with 4 or more years of service or any age with 25 or more years of service.

Annual Amount - In accordance with the following:

<u>Years of Service</u>	<u>Annual Benefit as a % of Final Average Earnings</u>
4	30.00%
5	36.25
6	42.50
7	48.75
8	55.00

Type of Final Average Compensation - Average of best 5 years prior to retirement date.

Early Retirement

Eligibility - Any age with 4 or more years of service.

Annual Amount - Computed as a normal retirement benefit based on final average compensation at early retirement date and multiplied by the Table A actuarial reduction factor to reflect retirement prior to normal retirement date.

Late Retirement

Eligibility - Anytime following eligibility for normal retirement and having attained 8 years of service.

Annual amount - Computed as a normal retirement benefit but actuarially increased to reflect late retirement on the basis of the factors specified in Table H, and based on final average compensation at late retirement date.

Deferred (Vested) Retirement

Eligibility - 4 or more years of service. Benefit commences at age 55.

Annual amount - Computed as a normal retirement benefit based on service and final average compensation at time of termination of employment.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
ELECTED OFFICIALS
(FOR MEMBERS ELECTED BEFORE 11/27/89)
(CONCLUDED)**

DEATH BEFORE RETIREMENT BENEFITS

Eligibility - Death while actively employed after 4 or more years of service. Payable to the employee's spouse for life.

Annual Amount - Equal to 50% of the retirement benefit the employee could have received if eligible for retirement at date of death. If the employee is not eligible to retire at date of death, the benefit begins at earliest date the employee could have retired had the employee survived. If the employee is not married at date of death, or has less than 4 years of service, the employee's named beneficiary will receive a refund of employee's contributions with interest.

Death After Retirement

In accordance with optional form of benefit elected by employee, if any.

Disability Retirement

Eligibility - No age or service requirement, but must be eligible to receive Social Security Disability Benefits.

Annual Amount - 66 2/3% of earnings with a maximum benefit of \$2,000/month. The benefit is re-calculated at normal retirement based on normal retirement benefit formula.

Member Contributions - 5% of compensation.

Interest on Member Contributions - 5% Annually.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
LOCAL 1128 AFSCME
(FOR MEMBERS HIRED ON OR AFTER 8/4/88)**

Normal Retirement

Eligibility - Age 55 with 10 or more years of service; or age 50 and 25 or more years of service beginning January 1, 2009. Employees hired after 12/22/2004 are not eligible to participate.

Annual Amount - 2.2% of Final Average Compensation per year of service to a maximum of 25 years of service.

Type of Final Average Compensation - Average of best 5 consecutive years prior to retirement date, excluding vacation, sick leave and other banks.

Early Retirement

Eligibility - Age 50 with 10 or more years of service.

Annual Amount - Computed as a normal retirement benefit based on final average compensation at early retirement date and multiplied by the Table A actuarial reduction factor to reflect retirement prior to normal retirement date.

Late Retirement

Eligibility - Age 55 and 10 or more years of service; or age 50 and 25 or more years of service beginning January 1, 2009.

Annual Amount - Computed as a normal retirement benefit but increased by 2.2% of final average compensation per year of service worked between the normal retirement date and the late retirement date.

Deferred (Vested) Retirement

Eligibility - 10 or more years of service. Benefit commences at age 55.

Annual Amount - Computed as a normal retirement benefit based on service and final average compensation at time of termination of employment.

Death Before Retirement Benefits

Eligibility - Death while actively employed after 10 or more years of service. Payable to the employee's spouse or dependent child(ren).

Annual Amount - Refund of employee's contributions or 50% of the employee's vested benefit, whichever is higher. If the employee is not eligible to retire at date of death, the benefit begins at the earliest date the employee could have retired had the employee survived. If the employee is not married nor has any dependent child(ren) at date of death, or has less than the required years of service, the employee's named beneficiary will receive a refund of employee's contributions.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
LOCAL 1128 AFSCME
(FOR MEMBERS HIRED ON OR AFTER 8/4/88)
(CONCLUDED)**

Death After Retirement

In accordance with optional form of benefit elected by employee, if any.

Disability Retirement

Eligibility - 10 years of service credited in System, and must be eligible to receive Social Security disability benefits.

Annual Amount - 2% of final average compensation per year of service. The benefit is re-calculated at normal retirement based on normal retirement benefit formula.

Member Contributions

5% of compensation, excluding cash payouts for vacation banks, sick leave banks and all other banks.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
LOCAL 1917
(FOR MEMBERS HIRED ON OR AFTER 8/4/88)**

Normal Retirement

Eligibility - Age 55 with 10 or more years of service; or age 50 and 25 or more years of service beginning January 1, 2009. Employees hired after 12/22/2004 are not eligible to participate.

Annual Amount - 2.2% of Final Average Compensation per year of service to a maximum of 25 years of service.

Type of Final Average Compensation - Average of best 5 consecutive years prior to retirement date, excluding vacation, sick leave and other banks.

Early Retirement

Eligibility - Age 50 with 10 or more years of service.

Annual Amount - Computed as a normal retirement benefit based on final average compensation at early retirement date and multiplied by the Table A actuarial reduction factor to reflect retirement prior to normal retirement date.

Late Retirement

Eligibility - Age 55 and 10 or more years of service; or age 50 and 25 or more years of service beginning January 1, 2009.

Annual Amount - Computed as a normal retirement benefit but actuarially increased to reflect late retirement on the basis of the factors specified in Table H, and based on final average compensation at late retirement date.

Deferred (Vested) Retirement

Eligibility - 10 or more years of service. Benefit commences at age 55.

Annual Amount - Computed as a normal retirement benefit but based on service and final average compensation at time of termination of employment.

Death Before Retirement Benefits

Eligibility - Death while actively employed after 10 or more years of service. Payable to the employee's spouse for life.

Annual Amount - Equal to 50% of the retirement benefit the employee could have received if eligible for retirement at date of death. If the employee is not eligible to retire at date of death, the benefit begins at earliest date the employee could have retired had the employee survived. (FOR MEMBERS HIRED ON OR AFTER 8/4/88)
(CONCLUDED)**

Death After Retirement - In accordance with optional form of benefit elected by employee, if any.

Disability Retirement

Eligibility - 10 years of service credited in System, and must be eligible to receive Social Security disability benefits.

Annual Amount – 2.2% of final average compensation per year of service. The benefit is recalculated at normal retirement based on normal retirement benefit formula.

Member Contributions - 5% of compensation, excluding cash payouts for vacation banks, sick leave banks and all other banks.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
TAYLOR GOVERNMENTAL MANAGEMENT AND ADMINISTRATIVE
EMPLOYEES ASSOCIATION
(FOR MEMBERS HIRED ON OR AFTER 5/18/88)**

Normal Retirement

Eligibility - Age 55 with 5 or more years of service. Employees hired after 3/6/2001 are not eligible to participate. Employees transferred from another bargaining unit on or after November 1, 2008 are not eligible to participate.

Annual Amount - The percentage of Final Average Earnings (FAE) as described below for service that was accrued before 1/1/2011, plus 2.25% of the FAE for each year accrued after 1/1/2011, not to exceed 65%.

For service accrued before 1/1/2011:

<u>Years of Service</u>	<u>Annual Benefit as a % of Final Average Earnings</u>
5	30.00%
6	32.50
7	35.00
8	37.50
9	40.00
10	42.50
11	45.00
12	47.50
13	52.50
14	60.00
15 or more	65.00

Type of Final Average Compensation - Average of best 5 years prior to retirement date.

Early Retirement

Eligibility - Any age with 5 or more years of service.

Annual Amount - Computed as a normal retirement benefit based on final average compensation at early retirement date and multiplied by the Table A actuarial reduction factor to reflect retirement prior to normal retirement date.

Late Retirement

Eligibility - Anytime following eligibility for normal retirement and having attained 15 years of service.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
TAYLOR GOVERNMENTAL MANAGEMENT AND ADMINISTRATIVE
EMPLOYEES ASSOCIATION
(FOR MEMBERS HIRED ON OR AFTER 5/18/88)
(CONCLUDED)**

Annual Amount - Computed as a normal retirement benefit but actuarially increased to reflect late retirement on the basis of the factors specified in Table H, and based on final average compensation at late retirement date.

Deferred (Vested) Retirement

Eligibility - 5 or more years of service. Benefit commences at age 55.

Annual Amount - Computed as a normal retirement benefit based on service and final average compensation at time of termination of employment.

Death Before Retirement Benefits

Eligibility - Death while actively employed after 5 or more years of service. Payable to the employee's spouse for life.

Annual Amount - If an employee who is vested in the pension plan dies prior to retirement, his/her beneficiary will receive the employee's accrued pension benefit for life actuarially adjusted based on the age of the beneficiary at the time the benefit is paid. Beneficiary shall be defined as: spouse or (in the absence of a spouse) minor children until the age of 21.

Death After Retirement

In accordance with optional form of benefit elected by employee, if any.

Disability Retirement

Eligibility - No age or service requirement, but must be eligible to receive Social Security disability benefits.

Annual Amount - 66 2/3% of earnings with a maximum benefit of \$2,000/month. The benefit is re-calculated at normal retirement based on normal retirement benefit formula.

Member Contributions - 5% of compensation.

Interest on Member Contributions - 2% Annually.

**BRIEF SUMMARY OF BENEFIT PROVISIONS APPLICABLE TO
ELECTED OFFICIALS
(FOR MEMBERS ELECTED ON OR AFTER 11/27/89

(CONCLUDED)**

Deferred (Vested) Retirement

Eligibility - 5 or more years of service. Benefit commences at age 55.

Annual Amount - Computed as a normal retirement benefit based on service and final average compensation at time of termination of employment.

Death Before Retirement Benefits

Eligibility - Death while actively employed after 5 or more years of service. Payable to the employee's spouse for life.

Annual Amount - Equal to 50% of the retirement benefit the employee could have received if eligible for retirement at date of death. If the employee is not eligible to retire at date of death, the benefit begins at earliest date the employee could have retired if he had survived. If the employee is not married at date of death, or has less than 5 years of service, the employee's named beneficiary will receive a refund of employee's contributions with interest.

Death After Retirement

In accordance with optional form of benefit elected by employee, if any.

Disability Retirement

Eligibility - No age or service requirement, but must be eligible to receive Social Security disability benefits.

Annual Amount - 66 2/3% of earnings with a maximum benefit of \$2,000/month. The benefit is re-calculated at normal retirement based on normal retirement benefit formula.

Member Contributions - 5% of compensation.

Interest on Member Contributions - 5% Annually.

SECTION F

ACTUARIAL COST METHOD AND ACTUARIAL ASSUMPTIONS

VALUATION ASSUMPTIONS

All actuarial assumptions are based on estimates of future experience, not market measures.

The rate of investment return (net of investment expenses) used in the valuation was 7.5%.

The annual rate of salary increase used in the valuation was 1%.

The mortality table used in the valuation to measure mortality is the RP-2014 Healthy Annuitant Mortality Table for males and females.

Sample Ages	Single Life Values					
	Present Value of		Percent Dying		Future Life	
	\$1 Monthly for Life		Next Year		Expectancy (Years)	
	Men	Women	Men	Women	Men	Women
50	\$135.75	\$139.58	0.4064%	0.2768%	32.47	35.15
55	130.04	134.43	0.5735%	0.3622%	28.18	30.66
60	122.84	127.60	0.7771%	0.5191%	24.03	26.25
65	113.67	118.89	1.1013%	0.8048%	20.01	22.00
70	102.35	108.18	1.6769%	1.2868%	16.19	17.97
75	88.99	95.45	2.6826%	2.0938%	12.66	14.23

VALUATION ASSUMPTIONS

Sample Rates of Separation from Active Employment Before Retirement, Death or Disability

Sample Ages	Percent of Active Members Separating within Next Year
20	7.94%
25	7.72
30	7.22
35	6.28
40	5.15
45	3.98
50	2.56
55	0.94
60	0.09

Probabilities of Becoming Disabled

Sample Ages	Percent Becoming Disabled During Next Year	
	Men	Women
20	0.07%	0.03%
25	0.09	0.05
30	0.10	0.07
35	0.14	0.13
40	0.21	0.19
45	0.32	0.28
50	0.52	0.45
55	0.92	0.76

VALUATION ASSUMPTIONS

The *normal retirement* assumption used in the valuation was as follows:

For all members from Local 1128 AFSCME and Local 1917:

Retirement Ages	Percent of Active Members Retiring within Next Year
50	50%
51	50%
52	50%
53	50%
54	50%
55	50%
56	10%
57	10%
58	10%
59	10%
60	100%

All other members were assumed to retire at their earliest normal retirement age.

The *early retirement* assumption used in the valuation was as follows:

For members in Local 1128 AFSCME and Local 1917 hired on or after 8/4/88, an early retirement rate of 5% was assumed for 5 years prior to normal retirement.

For members in all other groups, an early retirement rate of 5% was assumed for 7 years prior to normal retirement.

The *actuarial cost method* used in the funding valuation was the Aggregate Cost Method. For purposes of GASB Statement No. 67, the Entry Age Normal Cost Method was used.

Assets and liabilities held by Allmerica were excluded effective with the 2006 report.

**SUMMARY OF ASSUMPTIONS USED
DECEMBER 31, 2014
MISCELLANEOUS AND TECHNICAL ASSUMPTIONS**

Marriage Assumption:	100% of males and 100% of females are assumed to be married for purposes of death-in-service benefits.
Pay Increase Timing:	Beginning of (Fiscal) year. This is equivalent to assuming that reported pays represent amounts paid to members during the year ended on the valuation date.
Decrement Timing:	Decrements of all types are assumed to occur mid-year.
Eligibility Testing:	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
Benefit Service:	Exact fractional service is used to determine the amount of benefit payable.
Decrement Relativity:	Decrement rates are used directly from the experience study, without adjustment for multiple decrement table effects.
Decrement Operation:	Disability and mortality decrements do not operate during the first 5 years of service. Disability and separation do not operate during retirement eligibility.
Normal Form of Benefit:	The assumed normal form of benefit is the straight life form.
Loads:	The present value of future benefits for actives was loaded by 1.5% for groups that include vacation and sick leave banks in final average compensation.
Incidence of Contributions:	City contributions are assumed to be received 21 months after the valuation date. New entrant normal cost contributions, if any, will be computed annually as they occur.

SECTION G

CALCULATION OF THE SINGLE DISCOUNT RATE

CALCULATION OF THE SINGLE DISCOUNT RATE

GASB Statement No. 67 includes a specific requirement for the discount rate that is used for the purpose of the measurement of the Total Pension Liability. This rate considers the ability of the fund to meet benefit obligations in the future. To make this determination, employer contributions, employee contributions, benefit payments, expenses and investment returns are projected into the future. The Plan Net Position (assets) in future years can then be determined and compared to its obligation to make benefit payments in those years. As long as assets are projected to be on hand in a future year, the assumed valuation discount rate is used. In years where assets are not projected to be sufficient to meet benefit payments, the use of a municipal bond rate is required, as described in the following paragraph.

The Single Discount Rate (SDR) is equivalent to applying these two rates to the benefits that are projected to be paid during the different time periods. The SDR reflects (1) the long-term expected rate of return on pension plan investments (during the period in which the fiduciary net position is projected to be sufficient to pay benefits) and (2) tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating (which is published by the Federal Reserve) as of the measurement date (to the extent that the contributions for use with the long-term expected rate of return are not met).

For the purpose of this valuation, the expected rate of return on pension plan investments is 7.50%; the municipal bond rate is 3.57%; and the resulting SDR is 7.50%.

The tables in this section provide background for the development of the SDR.

The **Projection of Contributions** table shows the development of expected contributions in future years. Normal Cost contributions for future hires are not included (nor are their liabilities).

The **Projection of Plan Fiduciary Net Position** table shows the development of expected asset levels in future years.

The **Present Values of Projected Benefit Payments** table shows the development of the SDR. It breaks down the benefit payments into present values for funded and unfunded portions and shows the equivalent total at the SDR.

SINGLE DISCOUNT RATE DEVELOPMENT PROJECTION OF CONTRIBUTIONS

Year	Contributions from Current Employees	Normal Cost	Administrative Expense Contributions	UAL Contributions	Total Contributions
0					
1	\$ 163,630	\$ 100,108	\$ -	\$ 3,910,787	\$ 4,174,525
2	144,242	80,680	-	3,838,934	4,063,856
3	124,663	61,125	-	3,773,393	3,959,180
4	110,278	50,916	-	3,792,717	3,953,912

SECTION H

GLOSSARY OF TERMS

GLOSSARY OF TERMS

<i>Actuarial Accrued Liability (AAL)</i>	The AAL is the difference between the actuarial present value of all benefits and the actuarial value of future normal costs. The definition comes from the fundamental equation of funding which states that the present value of all benefits is the sum of the Actuarial Accrued Liability and the present value of future normal costs. The AAL may also be referred to as "accrued liability" or "actuarial liability."
<i>Actuarial Assumptions</i>	These assumptions are estimates of future experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and compensation increases. Actuarial assumptions are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (compensation increases, payroll growth, inflation and investment return) consist of an underlying real rate of return plus an assumption for a long-term average rate of inflation.
<i>Accrued Service</i>	Service credited under the system which was rendered before the date of the actuarial valuation.
<i>Actuarial Equivalent</i>	A single amount or series of amounts of equal actuarial value to another single amount or series of amounts, computed on the basis of appropriate actuarial assumptions.
<i>Actuarial Cost Method</i>	A mathematical budgeting procedure for allocating the dollar amount of the actuarial present value of the pension trust benefits between future normal cost and actuarial accrued liability. The actuarial cost method may also be referred to as the actuarial funding method.
<i>Actuarial Gain (Loss)</i>	The difference in liabilities between actual experience and expected experience during the period between two actuarial valuations is the gain (loss) on the accrued liabilities.
<i>Actuarial Present Value (APV)</i>	The amount of funds currently required to provide a payment or series of payments in the future. The present value is determined by discounting future payments at predetermined rates of interest and probabilities of payment.
<i>Actuarial Valuation</i>	The actuarial valuation report determines, as of the actuarial valuation date, the service cost, total pension liability, and related actuarial present value of projected benefit payments for pensions.
<i>Actuarial Valuation Date</i>	The date as of which an actuarial valuation is performed.
<i>Actuarially Determined Contribution (ADC) or Annual Required Contribution (ARC)</i>	A calculated contribution into a defined benefit pension plan for the reporting period, most often determined based on the funding policy of the plan. Typically the Actuarially Determined Contribution has a normal cost payment and an amortization payment.

GLOSSARY OF TERMS

<i>Amortization Payment</i>	The amortization payment is the periodic payment required to pay off an interest-discounted amount with payments of interest and principal.
<i>Amortization Method</i>	The method used to determine the periodic amortization payment may be a level dollar amount, or a level percent of pay amount. The period will typically be expressed in years, and the method will either be “open” (meaning, reset each year) or “closed” (the number of years remaining will decline each year).
<i>Cost-of-Living Adjustments</i>	Postemployment benefit changes intended to adjust benefit payments for the effects of inflation.
<i>Cost-Sharing Multiple-Employer Defined Benefit Pension Plan (cost-sharing pension plan)</i>	A multiple-employer defined benefit pension plan in which the pension obligations to the employees of more than one employer are pooled and pension plan assets can be used to pay the benefits of the employees of any employer that provides pensions through the pension plan.
<i>Covered-Employee Payroll</i>	The payroll of employees that are provided with pensions through the pension plan.
<i>Deferred Retirement Option Program (DROP)</i>	A program that permits a plan member to elect a calculation of benefit payments based on service credits and salary, as applicable, as of the DROP entry date. The plan member continues to provide service to the employer and is paid for the service by the employer after the DROP entry date; however, the pensions that would have been paid to the plan member are credited to an individual member account within the defined benefit pension plan until the end of the DROP period. Other variations for DROP exist and will be more fully detailed in the plan provision section of the valuation report.
<i>Deferred Inflows and Outflows</i>	The deferred inflows and outflows of pension resources are amounts used under GASB Statement No. 68 in developing the annual pension expense. Deferred inflows and outflows arise with differences between expected and actual experiences; changes of assumptions. The portion of these amounts not included in pension expense should be included in the deferred inflows or outflows of resources.
<i>Discount Rate</i>	For GASB purposes, the discount rate is the single rate of return that results in the present value of all projected benefit payments to be equal to the sum of the funded and unfunded projected benefit payments, specifically: <ol style="list-style-type: none"> 1. The benefit payments to be made while the pension plans’ fiduciary net position is projected to be greater than the benefit payments that are projected to be made in the period; and 2. The present value of the benefit payments not in (1) above, discounted using the municipal bond rate.

GLOSSARY OF TERMS

<i>Entry Age Actuarial Cost Method (EAN)</i>	The EAN is a cost method for allocating the costs of the plan between the normal cost and the accrued liability. The actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis (either level dollar or level percent of pay) over the earnings or service of the individual between entry age and assumed exit ages(s). The portion of the actuarial present value allocated to a valuation year is the normal cost. The portion of this actuarial present value not provided for at a valuation date by the actuarial present value of future normal costs is the actuarial accrued liability. The sum of the accrued liability plus the present value of all future normal costs is the present value of all benefits.
<i>GASB</i>	The Governmental Accounting Standards Board is an organization that exists in order to promulgate accounting standards for governmental entities.
<i>Fiduciary Net Position</i>	The fiduciary net position is the market value of the assets of the trust dedicated to the defined benefit provisions.
<i>Long-Term Expected Rate of Return</i>	The long-term rate of return is the expected return to be earned over the entire trust portfolio based on the asset allocation of the portfolio.
<i>Money-Weighted Rate of Return</i>	The money-weighted rate of return is a method of calculating the returns that adjusts for the changing amounts actually invested. For purposes of GASB Statement No. 67, money-weighted rate of return is calculated as the internal rate of return on pension plan investments, net of pension plan investment expense.
<i>Multiple-Employer Defined Benefit Pension Plan</i>	A multiple-employer plan is a defined benefit pension plan that is used to provide pensions to the employees of more than one employer.
<i>Municipal Bond Rate</i>	The Municipal Bond Rate is the discount rate to be used for those benefit payments that occur after the assets of the trust have been depleted.
<i>Net Pension Liability (NPL)</i>	The NPL is the liability of employers and non-employer contributing entities to plan members for benefits provided through a defined benefit pension plan.
<i>Non-Employer Contributing Entities</i>	Non-employer contributing entities are entities that make contributions to a pension plan that is used to provide pensions to the employees of other entities. For purposes of the GASB accounting statements, plan members are not considered non-employer contributing entities.
<i>Normal Cost</i>	The portion of the actuarial present value allocated to a valuation year is called the normal cost. For purposes of application to the requirements of this Statement, the term normal cost is the equivalent of service cost.

GLOSSARY OF TERMS

<i>Other Postemployment Benefits (OPEB)</i>	All postemployment benefits other than retirement income (such as death benefits, life insurance, disability, and long-term care) that are provided separately from a pension plan, as well as postemployment healthcare benefits regardless of the manner in which they are provided. Other post-employment benefits do not include termination benefits.
<i>Real Rate of Return</i>	The real rate of return is the rate of return on an investment after adjustment to eliminate inflation.
<i>Service Cost</i>	The service cost is the portion of the actuarial present value of projected benefit payments that is attributed to a valuation year.
<i>Total Pension Expense</i>	The total pension expense is the sum of the following items that are recognized at the end of the employer's fiscal year: <ol style="list-style-type: none"> 1. Service Cost 2. Interest on the Total Pension Liability 3. Current-Period Benefit Changes 4. Employee Contributions (made negative for addition here) 5. Projected Earnings on Plan Investments (made negative for addition here) 6. Pension Plan Administrative Expense 7. Other Changes in Plan Fiduciary Net Position 8. Recognition of Outflow (Inflow) of Resources due to Liabilities 9. Recognition of Outflow (Inflow) of Resources due to Assets
<i>Total Pension Liability (TPL)</i>	The TPL is the portion of the actuarial present value of projected benefit payments that is attributed to past periods of member service.
<i>Unfunded Actuarial Accrued Liability (UAAL)</i>	The UAAL is the difference between actuarial accrued liability and valuation assets.
<i>Valuation Assets</i>	The valuation assets are the assets used in determining the unfunded liability of the plan. For purposes of GASB Statement Nos. 67 and 68, the valuation assets are equal to the market value of assets.

Ms. Sheila Gorski-Schulte
Director of Human Resources/Risk Management
City of Taylor General Employees Retirement System
23555 Goddard Road
Taylor, MI 48180

Dear Sheila:

Please find enclosed 15 copies of the GASB Statement Nos. 67 and 68 Accounting and Financial Reporting for Pensions report of the City of Taylor General Employees Retirement System.

Sincerely,

Brad Lee Armstrong, ASA, EA, FCA, MAAA
